

The Representation Of Features In Non-linear Phonology: The Articulator Node Hierarchy

by Elizabeth Sagey

{REPLACEMENT-(...)-()}

Features - Google Books Result Nasal Assimilation and Labiovelar Geometry. The representation of features in non-linear phonology represented as consisting of one root node (7a), as opposed to two separate articulated segments and the feature hierarchy. UCLA Working Papers in Phonetics 72. ... The representation of features in nonlinear phonology : the articulator. WHY WE NEED DISTINCTIVE FEATURES? - CRIL (1) Articulator Node Hierarchy of Sagey (1990). Root. [strident] The Representation of Features in Non-Linear Phonology: The Articulator Node Hierarchy. The Representation of Features in Non-Linear Phonology: The . African Languages: An Introduction - Google Books Result

Georgian harmonic clusters: phonetic cues to phonological . in terms of other features and the notion of hierarchical feature structure . The representation of features in nonlinear phonology: the articulator node hierarchy. Nov 30, 2004 . Yip 2002 for reviews of these and other nonlinear properties of tone systems.) Work in autosegmental phonology and related frameworks has brought to light many analogues to ... structure forms a comprehensive hierarchy of features. 2. ... d. each feature and feature class is represented as a node on a ... The Geometry of Phonological Features - Information Management . On Feature Spreading and the Representation of Place of . - CiteSeer The Representation of Features in Non-Linear Phonology: The Articulator Node Hierarchy by Elizabeth Sagey, 9780815301523, available at Book Depository . Distinctive Feature Theory - Google Books Result much to the fact that it provides phonological representations with a simple mathematical structure . feature hierarchy based upon the evidence provided by sequential feature hierarchy. on the root tier, and that the first such node is linked to all the features of [p], the ... d. a pairing of an active and a passive articulator. Phonological Primes: Gestures or Features? - Cornell University Jul 26, 2011 . Why do icy targets present a challenge for phonological theory? a. The sets of targets Non-metrical representations of feature spreading are simpler than metrical representations. Icy targets The Representation of Features in Non-Linear Phonology: The. Articulator Node Hierarchy. New York and The representation of features in non-linear phonology 2 - The Egg The representation of features and relations in non-linear phonology what is interpreted: the phonological system of rules and representations itself. ... In this conception, gestures are de?ned not in terms of articulator movements as ... hierarchical structure if they are to capture a full range of phonological regularities. 3. with the other features of the segment, represented by the root node. The representation of features in non-linear phonology - Amazon.com *Phonology; Uncommonly Taught Languages. IDENTIFIERS ... consonants and nasal assimilation are to be represented in feature geometry. spreading from the minor articulator node [labial] as well as the major articulator, giving articulation higher in the hierarchy than the secondary one, but unlike Selkirks, the C&H. Cantonese consonantal development: towards a nonlinear account 3. Phonology - Chicago Language Modeling Lab The Representation of Features and Relations in Non-linear Phonology . on phonetics: Features are grouped according to the articulator in the vocal tract that ... I redefine the distinctive features (i.e. the terminal nodes in the hierarchy) in light ... The Representation of Features and Relations in Non-linear . Feature organization (pdf) - Nick Clements - Free two branching class nodes, the Articulator Node and the Tongue Position Node. ... It has been pointed out by many non-linear phonology researchers, such as Sagey ... features are represented as a bundle without any internal hierarchy. The Representation of Features in Non-Linear Phonology: The . Publication » The Representation of Features in Non-Linear Phonology: The Articulator Node Hierarchy. a vowel feature hierarchy for contrastive specification - Toronto . AbeBooks.com: The representation of features in non-linear phonology: The articulator node hierarchy (Outstanding dissertations in linguistics) ... Turbulent Sounds: An Interdisciplinary Guide - Google Books Result The new theory of phonological representations and operations that we propose . Designated articulators are indicated by features, rather than nodes in the geometry (Chom- ... hierarchy that is appropriately represented by a tree diagram. Contemporary Views on Architecture and Representations in Phonology - Google Books Result closure features {continuant, consonantal] to the articulators that execute them. ... and 3, and 1 define the non—terminal nodes in the hierarchy . Chapter 5 ... Features in Phonology and Phonetics: Posthumous Writings by Nick . - Google Books Result opmental order in the acquisition of hierarchical features. Decreasing ... one-by-one serially in a linear manner, whereas nonlinear phonology assumes ... provides a representation of the Cantonese disyllabic word /mou%kWn/ The laryngeal node feature, [spread glottis] denotes fricatives articulator node hierarchy. The Synchronic and Diachronic Phonology of Ejectives - Google Books Result of different shapes, this procedure may produce different representations for a vowel and . _ First of all, I assume monovalent phonological features. (see,-for example ... underV—place the Labial and Coronal articulator nodes are Hume, E. (1992) Front Vowels, Coronal Consonants and their Interaction in Nonlinear. The Blackwell Companion to Phonology, 5 Volume Set - Google Books Result The representation of features in non-linear phonology : the articulator node hierarchy / Elizabeth Sagey. ?????: ??; ?????: New York : Garland, 1990 ... Chapter

3 Feature Geometry 3.0. Introduction Download as a PDF - CiteSeer The representation of features in non-linear phonology: The articulator node hierarchy (Outstanding dissertations in linguistics) [Elizabeth Sagey] on . Phrasal and Clausal Architecture: Syntactic Derivation and . - Google Books Result debates about the segment, feature hierarchies, contrast, and phonological . Articulation (where the sign is made), Movement (how the articulators move), ... itself—i.e., the root node at the top of the structure is an entire lexeme, a stem, not a in the representation, but Handshape was identified as having non-linear.
